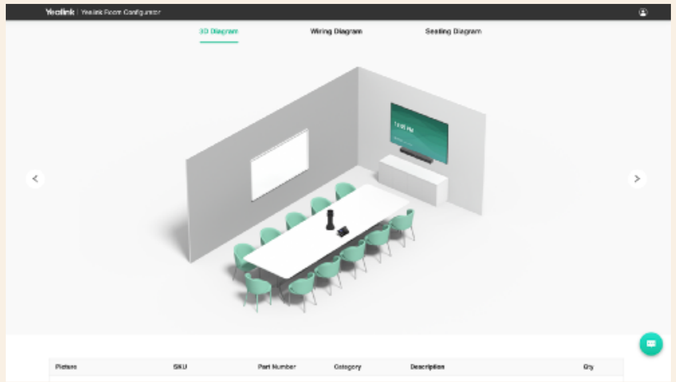
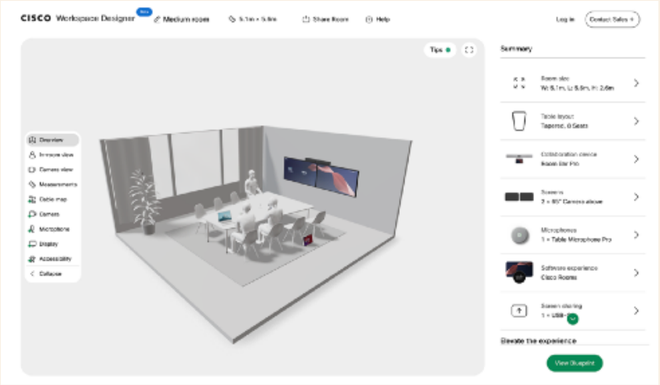
# EXAMPLES

Manufacturers all have their own version of system designer. But this is limiting for integrators.

**YEALINK**
Room designer for the configuration and validation of YEALINK Devices.

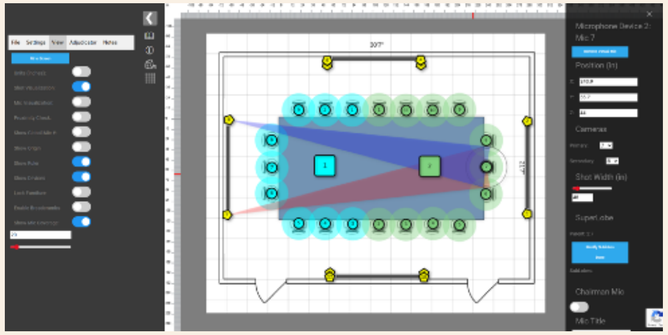


**CISCO**
Room designer for the configuration and validation of CISCO Devices.



**NEAT**
Room designer for the configuration and validation of NEAT Devices.

**CRESTRON**
Room designer for the configuration and validation of CRESTRON Devices.



# MARKET

AV_OFF/ON sits in the emerging automation software layer, specifically in design and lifecycle intelligence.

**AV over IP is now a matured technology in the industry, most devices are networked and can be monitored.**

**Device functionality and interoperability can be configured and validated from inception.**
