AV_OFF/ON

DEMO

Users are able to design with a specific manufacture or a verity of combination based on desired functionality.

DATABASE

SCHEMATICS

ROOM DESIGNER

Schematics can be auto generated and validated from a Bill of Material

All the major manufacturer have been added to the database

Devices are displayed in the 3D spaces. AVIXA standards are applied.

AV_OFF/ON

BUSINESS MODEL

Initially offered as a freemium service to accelerate adaptation and gain trust within the industry.

FREEMIUM

- Create and design AV systems
- Limited projects
- Access to core devices library for updated spec sheets and CAD files
- Basic system validation
- Single user (no collaboration)

PREMIUM

- Unlimited projects
- Full device intelligence library, with recommendation for alternative devices based on price or functionality.
- Advance system validation and insights
- Upload and validate existing designs
- Collaboration across teams
- System comparison and optimisation
- Lifecycle tracking and system history
