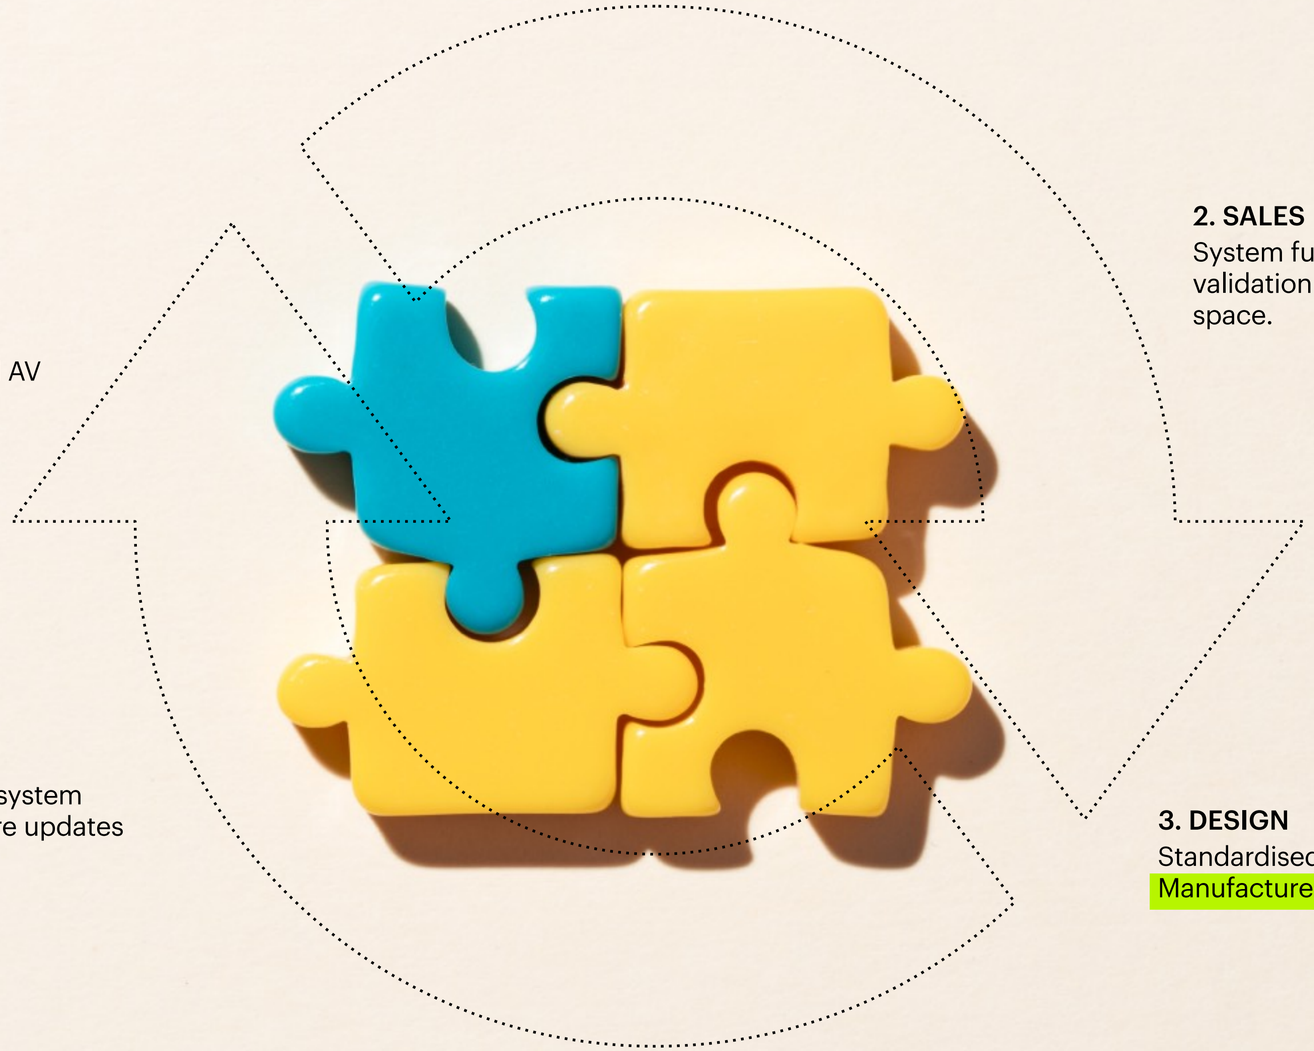
SOLUTION

An automated intelligent system that builds, monitors and validates functionality of the entire AV eco-system.

1. AV_OFF/ON
Cloud based, intelligent digital twin for deployed AV systems.

2. SALES
System functionality validation in a 3D virtual space.



3. DESIGN
Standardised deployments, Manufacturer-agnostic.

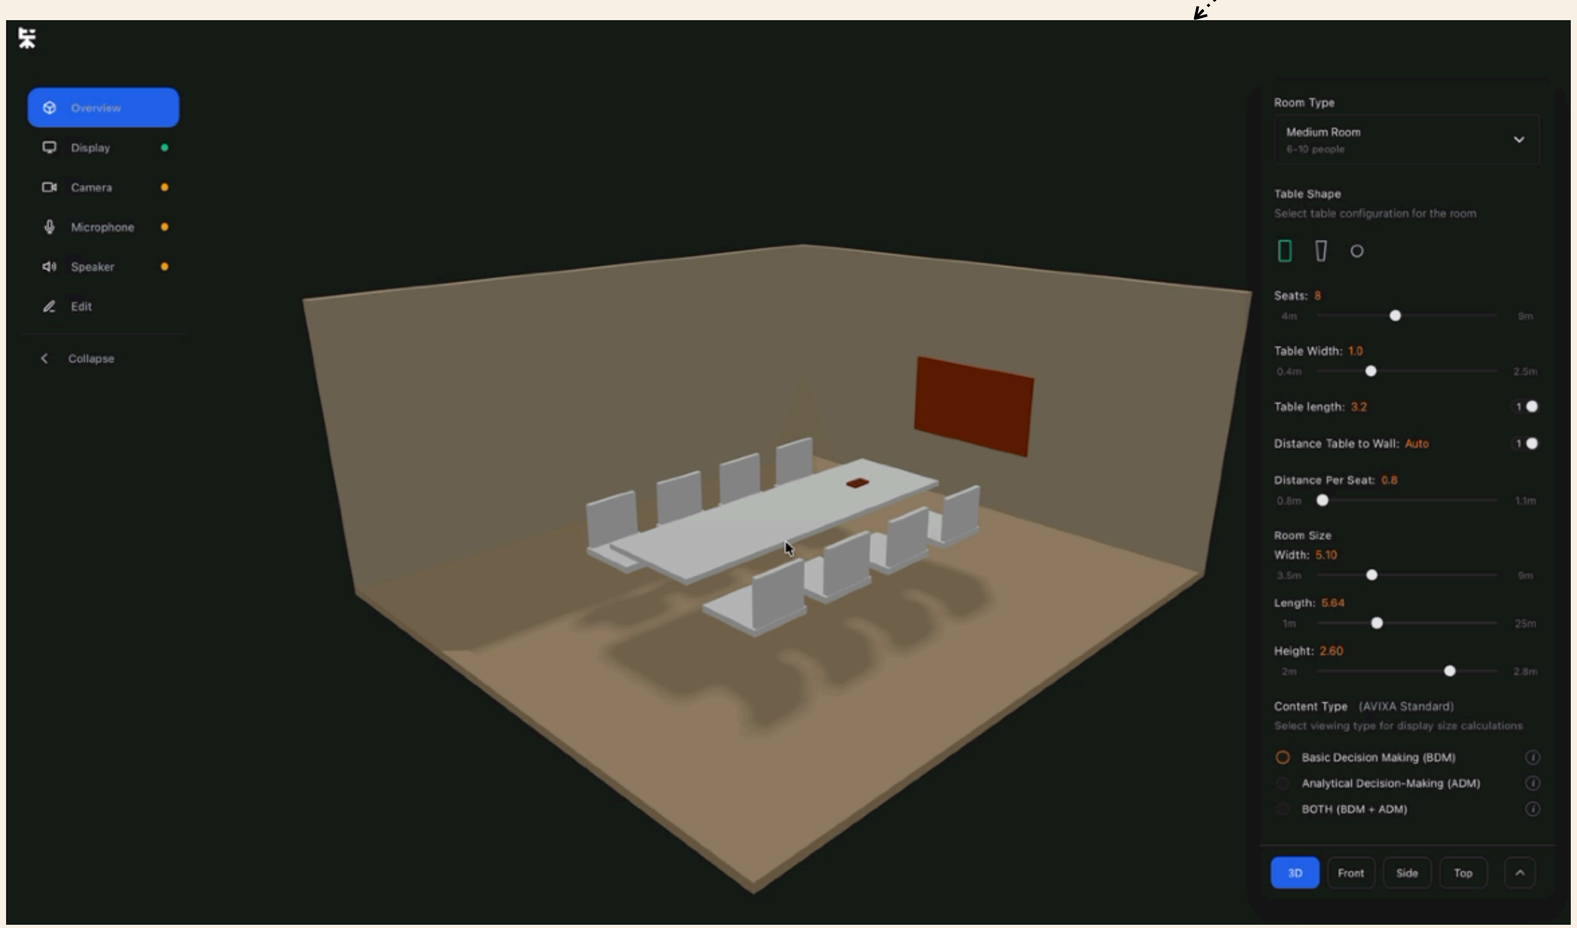
4. OPERATIONAL
Live monitoring of system functionality, feature updates and End of life.

AV_OFF/ON

DEMO

Users are able to design with a specific manufacture or a verity of combination based on desired functionality.

Click to PLAY



DATABASE
All the major manufacturer have been added to the database

SCHEMATICS
Schematics can be auto generated and validated from a Bill of Material

ROOM DESIGNER
Devices are displayed in the 3D spaces. AVIXA standards are applied.
