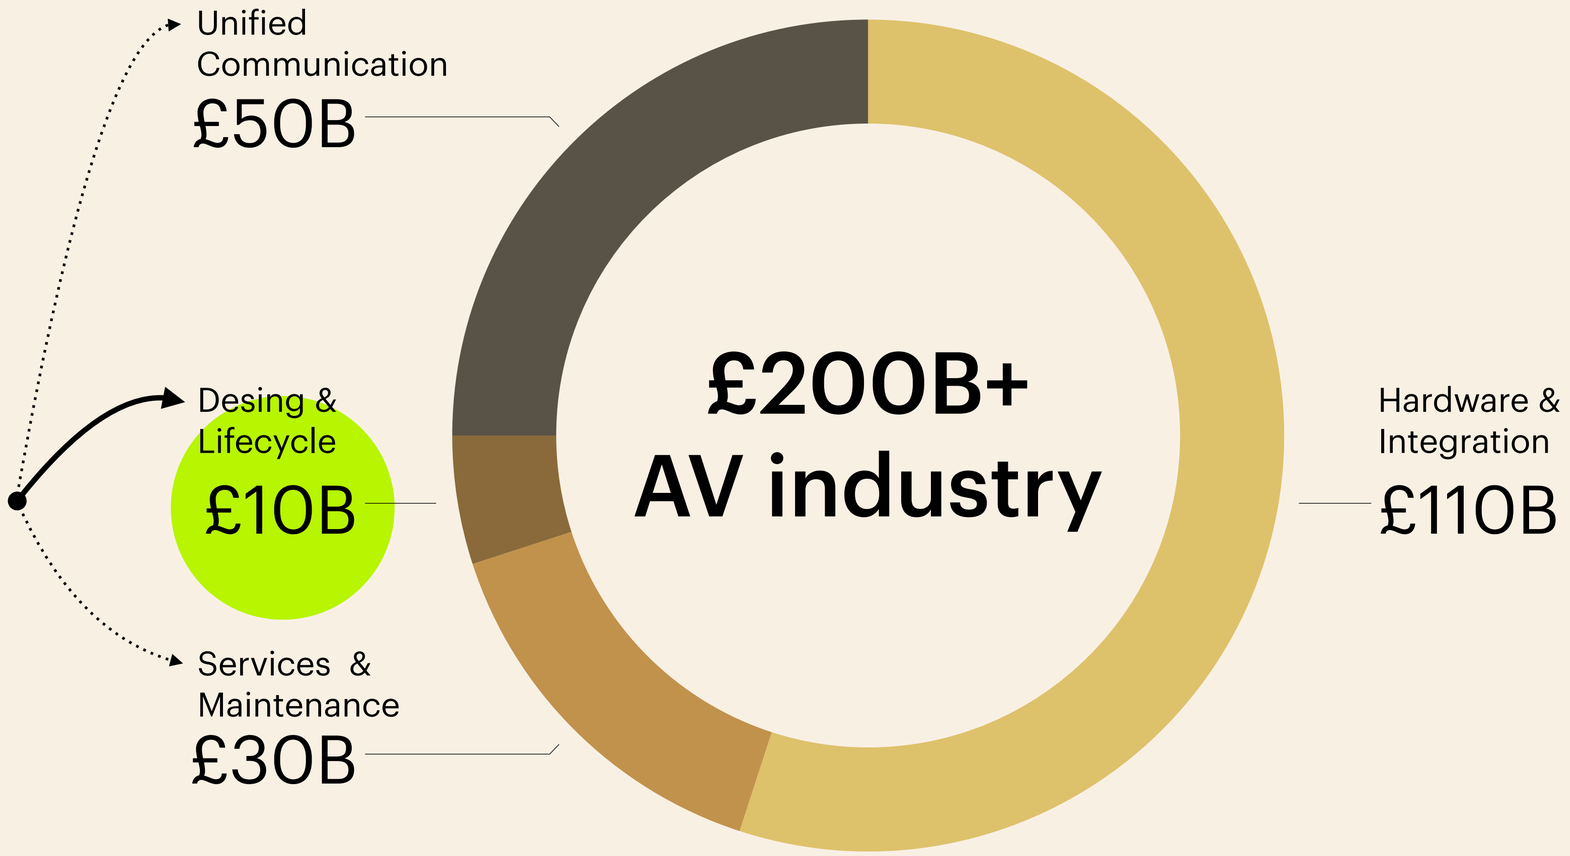
MARKET

AV_OFF/ON sits in the emerging automation software layer, specifically in design and lifecycle intelligence.

AV over IP is now a matured technology in the industry, most devices are networked and can be monitored.

Device functionality and interoperability can be configured and validated from inception.



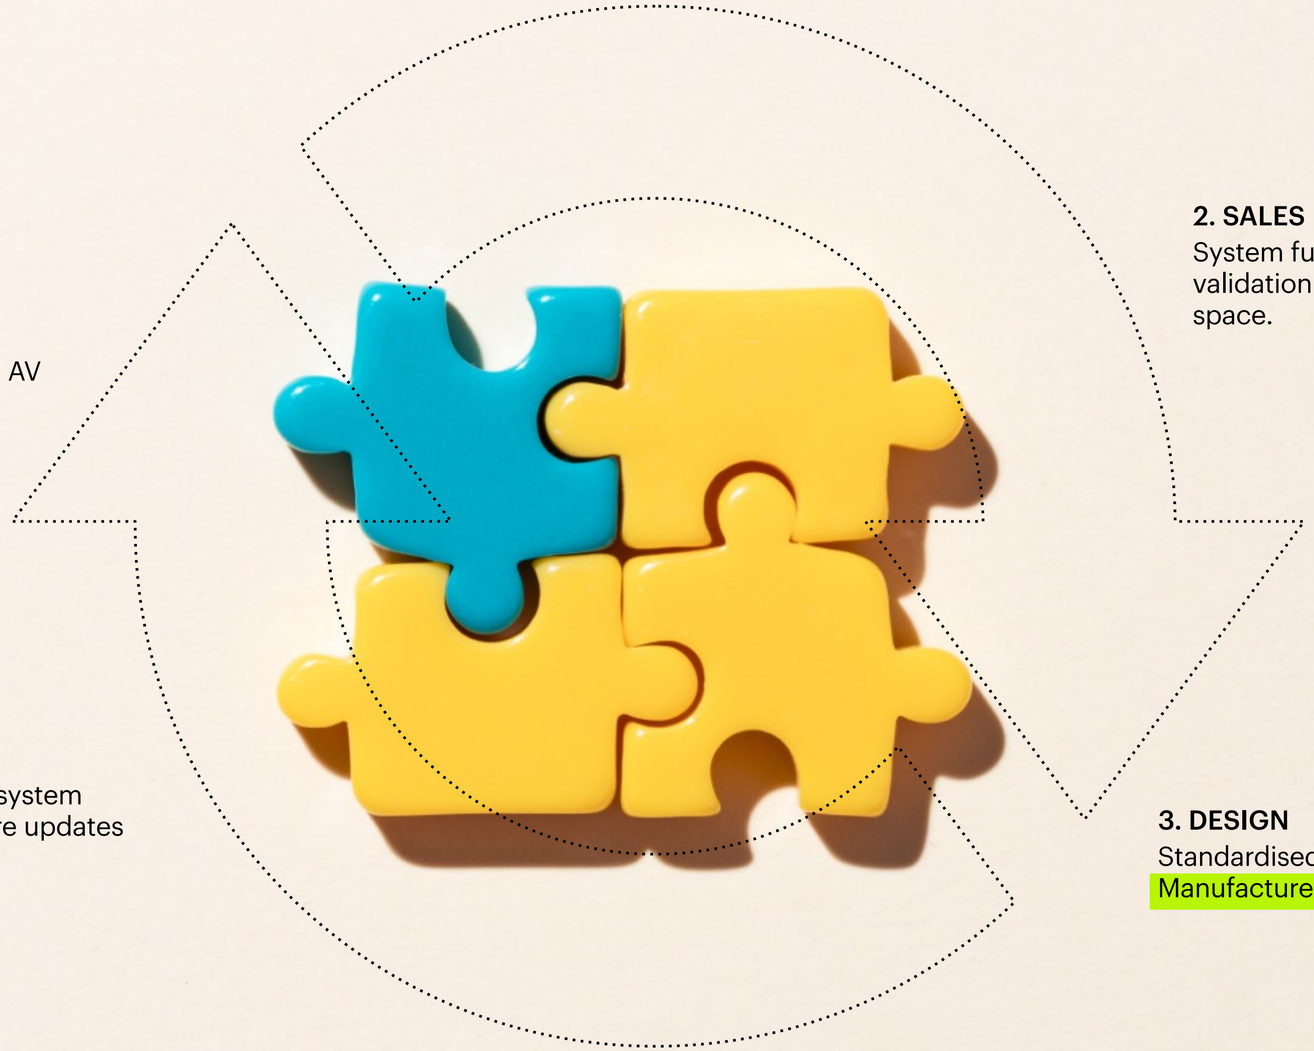
Sources: AVIXA, IDC, Gartner

SOLUTION

An automated intelligent system that builds, monitors and validates functionality of the entire AV eco-system.

1. AV_OFF/ON
Cloud based, intelligent digital twin for deployed AV systems.

2. SALES
System functionality validation in a 3D virtual space.



3. DESIGN
Standardised deployments, Manufacturer-agnostic.

4. OPERATIONAL
Live monitoring of system functionality, feature updates and End of life.
